

Did you know?

eXPRS Pro Tip for CDDP, Brokerage, CIIS Staff Transportation record needed to Authorize OR004-Mileage in Ancillary Services - SE257

Did you know ...

... that **OR004-Mileage in SE257-Ancillary Services** can only be authorized for a specific type of provider record? Using a Foster Care provider's FC services record will not work.

All direct client services in Plan of Care are mapped to specific types of provider records to be used on SPAs to authorize the service. Some service procedure codes are mapped to several types of provider records, others are mapped to just one type. When adding provider records to your CME POC Provider panel, it is important that you add the correct provider record & type needed for the provider for the service being authorized.

For **OR004-Mileage in SE257-Ancillary services**, there is just one type of provider record that is allowed: type **72-717-DD Non-Medical Transportation Org**. This is a **service location provider record** (aka: a "child" record that lives under the main "parent" record for the provider). You can often identify this record by the **EXL** code listed under the **TYPE** column and/or **Prov Type & Specialty** label listed for the record when searching for provider records to add to your panel.

Here's an example:

eXPRS Type	SPD Prov ID	SPD Prov ID	TIN/SSN	Display Name	Prov Type & Specialty	Verification	Beds	Program Start	Program End	Program Status	Primary Email
EXP	2****6	1****1	xxx-xx-xxxx	Name AFH 53 Trans Prov TRFFS	Service Agency - DD Comprehensive Service Agency	OMAP Number Issued		7/1/2011	12/31/9999	A	
EXL	2****7	1****2	xxx-xx-xxxx	Name AFH 53 Trans Prov SE53 CountyTRFFS	SPD Transportation - DD Non-Medical Transportation Organization	OMAP Issued					

This is the record type needed for OR004-Mileage in SE257-Ancillary Svc.

Remember ... add the correct record type for the provider to your POC Provider Panel to successfully authorize OR004-Mileage for them in SE257.
